

ENVIRONMENTAL POLICY

Aware of the importance that our activity has in protecting the environment, namely in terms of the production and waste handling, protection of soils and aquatic ecosystems, reduction of greenhouse gas emissions, reduction of noise emissions, as well as reduction from the use of plastics, Tekcleanparts, Lda is committed to implementing the best environmental practices, complying with the laws, standards and instruments that emanate from it, thus enshrining the right and duty, as an active part in society, for the protection of our planet.

Objectives

At Tekcleanparts we excel in processes that naturally do not produce waste and that do not pose risks to human health and the environment, or when this is not possible, we favor reuse and then recycling. We constantly seek to develop operational practices with relevance for the protection of the environment and for the sustainable development of our activity and that of our customers where we provide our services.

Due to a reflection motivated by the new challenges of humanity, we are committed to the protection of the environment, considering it as a decisive factor in making decisions in our actions, namely with regard to minimizing the consumption of raw materials, water, electricity and fuels, promoting whenever possible their reduction, reuse and / or recycling.

As an entity with social responsibility, we aim to actively contribute to the decarbonization of the economy, with a rapid conversion of fossil-based energies to alternative, green and more environmentally friendly energies.

Commitment

Promote the most environmentally friendly cleaning technologies to your customers.

Adopt the necessary measures to prevent environmental risks, especially serious accidents and limit their consequences on the environment, as well as keep the respective Contingency Plans active.

Promote continuous process improvement through the establishment of objectives and goals.

Encourage the attention and training of staff at all levels, promoting a greater degree of sensitivity, responsibility and awareness of the need to protect and preserve the environment.

Maintain an internal and external environmental communication channel, with transparency criteria, establishing a cooperative relationship with the authorities and an open dialogue with stakeholders and the public

The Management of Tekcleanparts, Lda, ensures that the Environmental Policy is understood, implemented, kept up to date, and communicated to employees and is available to the public, providing all the necessary resources for this.
